Subject Index

1.5 μm wavelength 309

Absorption 57
AFM 35
Amorphous solids 63, 375
Angular multiplexing 207
Aptamer 149

Carcinoma 115
Chloroplasts 107
Coherent saturation 367
Coherent transients 281
Confocal microscopy 7
Conjugated polymer 41, 45
Crystal modifications 7
Cubic ice 183
Cytochrome b_{562} 141

Dephasing 57
Dimers 257
Disorder 197
DNA–protein recognition 149
DNA quadruplex structures 149
Dye–DNA interaction 153, 163
Dynamical disorder 97

Electron–phonon coupling 189
Electron transfer 91
Electronic interactions 23
Electronic spectra 213
Electrostatic image 1
Energy transfer 123, 231, 249
Exciton–polariton 35
Exciton relaxation 257
Excitons 23

Fluorescence 41, 45, 81, 97
Fluorescence of single molecules 91
Fluorescence quenching 301
Fluorescent dyes 91
FMO complex 249

Glass 289
Glass dynamics 63, 375

High pressure 123
High-resolution spectroscopy 75
Hole burning 115, 131, 141, 153, 183, 197, 289
Hole-burning mechanisms 183, 221
Holography 207
Homogeneous line widths 295
Hot carriers 1
Hydrophobic hydration 177
Hyperquenched water 183

Imaging spectroscopy 15
Infrared spectroscopy 177
Interference 57, 325
Intermolecular energy transfer 257

J-aggregate 35

Klenow fragment 81

Labeling dye 149
Laser stabilization 309
Light-harvesting complex 123
Linear frequency chirp 355
Lithography 15
Local currents 1

$M/\#$ 207
Membrane potential 115
Microscopy 35
Micro-spectroscopy 107
Mitochondria 115
Molecular aggregates 23
Molecular crystals 171
Multi-photon excitation 107
Multiple scattering 325

Nanocrystals 15, 49
Near-infrared femotosecond laser pulses 317
Nonlinear spectroscopy of molecules 341
Non-photochemical hole burning 123
Non-resonant holes 149, 257

Optical coherent transients 367
Optical memory 325, 331

Optical memory materials 213
Optical nutation 367
Optical superradiance 331
Optical transitions 213

Perylene 265
Phase transitions 197
Photo-bleaching 107
Photochemical hole-burning 301, 317
Photochemistry of single molecules 91
Photochromism 221
Photoemission 281
Photoluminescence 7, 15
Photon echo 63, 331
Photon-gated electron transfer 207
Photon-gated hole burning 281
Photophysics 45
Photosynthesis 249
Photosystem II reaction center 131
Point defects 171
Polarization 35
Polymer matrices 91
Pressure 177
Pressure effect 163
Pressure tuning 171
Proton tautomerization 221
Proton tunneling 197
Protoporphyrin IX 141
Pseudoisocyanine 35

Quantum dots 49

Raman microscopy 7
Rare earths 281, 289, 309
Rare gas matrixes 265
Reflection spectroscopy 35
Resonance 1
Rotational tunneling 197

Satellite hole spectra 163
Second-harmonic generation 7
Semiconductor 1, 49
Shpol'skiı matrix 75
Shpol'skii system 273
Single molecule imaging 81
Single molecule spectroscopy 23, 63, 75
Single molecules 1, 41, 45, 57, 97
Soft potential model 375
Sol–gel 289
Spatial-spectral holography 355
Spectral hole burning 171, 189, 207, 213, 231, 237, 309
Spectroscopic properties 273
Stark effect 75, 115, 153
Stimulated photon echo 355, 367
Supercontinuum 317
Supramolecule 237
Surface-enhanced Raman scattering 81

Theory 63
TLS 197
TNP–ATP 81
TOPO-capped 49
True time delay 355
Two-photon absorption 341

Up-conversion 231

Van-Vleck paramagnets 331

Xerogels 189

Materials Index

Adenine 81
Aluminum phthalocyanine tetrasulfonate 189

Borate glasses 317

CdSe 49

Dibromothymoquinone 131
Dimethyl-s-tetrazine 171
Durene 171

Er^{3+} 281, 309
Eu-ion concentration 301
Europium 295

Fullerene 231, 237, 245

Gallium selenide 7

Inorganic glasses 295

Naphtophthalocyanines 207
Nd^{3+}:YVO_4 281
n-nonane 273

Porphyrins 213, 221, 237

Si-naphthalocyanine 231
Silicon 15
Silver coloidal particles 81
Sm^{2+} 317
Sodium-borate glass 301

Terrylene 265, 273
Toluene matrix 245
